SUNDAY MOSES BENJAMIN

Lagos, Nigeria

sundaybenjamin08@gmail.com, https://github.com/mosesbenjamin, https://www.linkedin.com/in/moses-s-06008512b

Intermediate Software Engineer with experience working on the client and server side of web applications. Manage, deploy and maintain application, system and project infrastructure.

PROFESSIONAL EXPERIENCE

DEMZ ANALYTICS   **Lagos, Nigeria**
Full-stack Software Engineer   *Mar 2020 – Present*

- Leveraged Nylas Calendar API to fully integrate with 100% of all calendar providers (Gmail, Outlook, Microsoft Exchange), streamlining scheduling and calendar sync for end users, and saving the company six(6) weeks of engineering work in just a few days.
- Incorporated Apache Kafka to serve as a source of truth for logging, collecting, maintaining, and processing events published by the company's loosely coupled applications (microservices), guaranteeing data resilience and message ordering with good retention options, making it possible for the business to scale and accommodate influx of user traffic
- Implemented OAuth 2.0 to enable the company's web applications access resources that belong to customers and make requests on their behalf. In turn, customers allow access to only data they would like to share without revealing their identity, credentials and access to other sensitive information

FAIMRS   **Lagos, Nigeria**
Software Engineering Intern   *Aug 2020 – Jan 2021*

- Revamped the company's page load speeds and increased SEO performance metrics using Google Lighthouse Audit
- Performed automated tests with Cypress and React Testing Library to minimize debugging in production, allowing the business to focus on delivering value to its customers.
